The Institute of Organic Chemistry of the Academy of Science of the USER OUTRED BY SOURCE OTHER OF INFORMATION  1. The Institute of Organic Chemistry of the Academy of Science of the USER in Moscow, which has done a good bit of recent work in organo-phosphorus compounds, is probably now the next important Soviet research institute in that particular field. This institute is apparently of fairly recent origin, as the first publications entaking therefrom began in 1995.  2. A comparative newcomer, M I Mabachnik, of this institute, has done very good years in the past two years.  3. The publications of the Institute of Organic Chemistry appear in the Isvestia of the Academy of Science. All the rest of the recently published work in the physical companies of the Institute, published a book on organo-phosphorus compounds in 1980, entitled "Organicheskie Scedimenty Fosfore". First all very good  YM Firsts, of this institute, published a book on organo-phosphorus compounds in 1980, entitled "Organicheskie Scedimenty Fosfore". First all very good  YM Firsts and that there is not even a copy in the Idbrary of Congress.    Particular of Congress of Chemistry Fosforer	DUNTRY	many di			A No.	.1.		
The Institute of Organic Chemistry of the Academy of Science of the USMR  IN FORMATION  The Institute of Organic Chemistry of the Academy of Science of the USMR  In Mesons, which has done a good bit of recent work in organo-phosphorus compounds, is probably now the nost important Soviet research institute in that perfecular field. This institute is apparently of fairly recent owigin, as the first publications canazaing therefrom began in 1959.  A comparative newcomer, M I Esbachnik, of this institute, has done very good work in the part two years.  The publications of the Institute of Organic Chemistry appear in the Isvestia of the Academy of Science. All the rest of the recently published work in phosphorus has apparently been done at the Beam Chemical Institute, one The First, of this institute, published a book on organo-phosphorus compounds in 1940, estitled "Organicheside Scedimenty Tosform". First did very good  Why Issa and Issa Germany.  There is only one copy of this book available in the US and that there is not even a copy in the Idbrary of Congress.  Pering a German, Flets was very probably either executed or sent to Eiberia following the outbrook of var between the USSR and Issa Germany.  Pering a German, Flets was very probably either executed or sent to Eiberia following the outbrook of var between the USSR and Issa Germany.
